Subject: Praire / Starkville Ether Sites, Praire, Monroe County
and Starkville, Oktibbeha County, Mississippi; POLREP #1
and Final (Revised)

Date: 05 June 1990

SITE HISTORY:

Two historic sites of ether were located by the State of Mississippi. The sites are located in Praire, Monroe County and Starkville, Oktibbeha County, Mississippi. Following confirmation of existence by EPA, the ether is to be removed by detonation.

SITUATION:

On 10 May 1990, EPA verified the existence of the ether at the two above listed locations and planned for removal by detonation. Thirty-one (31) cases, equaling two thousand nine hundred and seventy-six (2976) quarter pound cans, were verified at the Praire location and three quarters (3/4) of a case, equaling seventy-two (72) quarter pound cans, was verified at the Starkville location. Detonation sites for each location were chosen and all proper authorities were notified of upcoming intentions.

STATUS:

On 15 May 1990, ERCS contractor, O. H. Materials, detonated the ether at the two locations in six (6) separate explosions. The detonations were complete and no future actions by EPA are expected.

ESTIMATED COSTS:

ERCS	\$11,000.00
EPA	1,000.00
TAT	2,500.00
TOTAL	\$14,500.00
